Take care when using the word [vector] as it can have two meanings in this book: geographic vector data and the vector class (note the monospace font) in R. The former is a data model, the latter is an R class just like data.frame and matrix. Still, there is a link between the two: the spatial coordinates which are at the heart of the geographic vector data model can be represented in R.

Heap pollution can only occur if the program performed some operation involving a raw type that would give rise to a compile-time unchecked warning (§4.8, §5.1.9, §5.5.2, §8.4.1, §8.4.8.3, §8.4.8.4, §9.4.1.2, §15.12.4.2), or if the program aliases an array variable of non-reifiable element type through an array variable of a supertype.

4. Turn a list into a palindrome, i.e. it should read the same both backwards and forwards. For example, given the list [1,2,3,3,2,1]. The function should return [1,2,3,3,2,1]. 5. Write a function that determines whether its input list is a palindrome. 6. Expressing Emotions. Emotion sharing involves communicating the circumstances, thoughts, and feelings surrounding an emotional event. Emotion sharing usually starts immediately following an emotional episode. The intensity of the emotional event corresponds with the frequency and length of the sharing, with high-intensity events being told more often and over a longer period.

4.4.3 What are the benefits of ADDIE? One reason it has been so successful is that its content is heavily associated with good quality design, with clear learning objectives, carefully structured content, controlled workloads for faculty and students, integrated media, relevant student activities, and assessment strongly tied to desired learning outcomes.

Chapter 3.5: Freud's Ego Defense Mechanisms
Chapter 3.6: Kohlberg's Stages of Moral Development

Analogous to attribute subsetting (covered in Section 3.2.1), subsets of sf data frames can be created with square bracket ([) operator using the syntax x[|, , op = st_intersects], where x is an sf object from R.
Chapter 3 is devoted to the introduction of Gatsby and the lavish, showy world he inhabits. Fitzgerald gives Gatsby a suitably grand entrance as the aloof host of a spectacularly decadent party. Despite this introduction, this chapter continues to heighten the sense of mystery and enigma that surrounds Gatsby, as the low profile he maintains.

Nonverbal cues account for much of the content from which we form initial impressions, so it's important to know that people make judgments about our identities and skills after only brief exposure.
