For generations, the marsh-surrounded town of Shimmer, Maryland has played host to a loose movement
of African-American artists, all working in different media, but all utilizing the same haunting color.
Landscape paintings, trompe l'œil quilts, decorated dolls, mixed-media assemblages, and more, all
featuring the same peculiar hue, a shifting pigment somewhere between purple and pink, the color of the
saltmarsh orchid, a rare and indigenous flower. Graduate student Xavier Wentworth has been drawn to
Shimmer, hoping to study the work of artists like quilter Hazel Whitby and landscape painter Shadrach
Grayson in detail, having experienced something akin to an epiphany when viewing a Hazel Whitby
tapestry as a child. Xavier will find that others, too, have been drawn to Shimmer, called by something
more than art, something in the marsh itself, a mysterious, spectral hue. From Lambda Literary Award-
nominated author Craig Laurance Gdney (Sea, Swallow Me & Other Stories, Skin Deep Magic) comes A
Spectral Hue, a novel of art, obsession, and the ghosts that haunt us all.ONLY SAY THAT WE ARE
"HUMAN!" This was the first false hood perpetrated upon us by this world that WE WERE LESS THAN
HUMAN. We must re-define our culture, our race, and our attributes, but, even we have to stop
determining ourselves in an overstated vernacular that only helps to compensate for any so-called
deficiency. Now we assume our humanity. It is a humbling position for a human being to admit to.
Recounts the month-long battle between U.S. Marines and North Vietnamese forces for control of the historically
significant city of Hue | Hue Boy is small - smaller than all his friends, and he doesn't seem to grow at all, no
matter what his mother gives him to eat, or how much he runs and jumps and plays. His mother takes him
first to the doctor, and then to the Wise Man of the village. But nothing seems to help Hue Boy to grow.
Then Hue Boy's father comes home from working overseas, and at last Hue starts to grow. With his dad
back, he feels comfortable with himself, and his size doesn't worry him any more. Reverend George D.
Johnson's Profiles in Hue is one of the most exhaustive works on the history of black America. But what
makes Johnson's work stand apart from other works is that he does not limit himself to the history of
blacks, but includes a discussion on other racial groups, such as the Japanese internment during WWII
and Native Americans that have suffered mistreatment. Johnson says, "I never really liked the term "Black
History because of its narrowness. Longevity has taught me to believe there is only one Universal race
and that's the human race, comprised of many shades of colors, coming from a single source of LIGHT. And
upon that belief I could not limit my research to just the history of blacks who have contributed to making
the multi-color quilt that covers this great country of ours known as the United States of America [in
which] the title of this book: Profiles in Hue” emerged. Johnson's exhaustive seminal work provides us with
a more exhaustive piece on politics and religion, arts and sciences, labor and industry, law, education,
sports and entertainment, among other fields. Another purpose of Johnson's treatise is to acquaint young
minds with the “hardships, defeats, and victories of those who came before them.” By doing so, these
young minds can pick up the intellectual torch and keep hope alive. Johnson says, “It’s essential that we
must always try to keep alive the memories” of those who came before us. Winner of the Overseas Press
Club Cornelius Ryan Award John Laurence covered the Vietnam war for CBS News from its early days,
through the bloody battle of Hue in 1968, to the Cambodian invasion. He was judged by his colleagues to
be the best television reporter of the war, however, the traumatic stories Laurence covered became a
personal burden that he carried long after the war was over. In this evocative, unflinching memoir, laced
with humor, anger, love, and the unforgettable story of Méo, a cat rescued from the battle of Hue,
Laurence recalls coming of age during the war years as a journalist and as a man. Along the way, he
clarifies the murky history of the war and the role that journalists played in altering its course. The Cat
from Hue has earned passionate acclaim from many of the most renowned journalists and writers about
the war, as well as from military officers and war veterans, book reviewers, and readers. This book will
stand with Michael Herr's Dispatches, Philip Caputo's A Rumor of War, and Neil Sheehan's A Bright,
Shining Lie as one of the best books ever written about Vietnam-and about war generally.
The classic debut collection from Pulitzer Prize winner James Alan McPherson Hue and Cry is the remarkably mature and
able debut story collection from James Alan McPherson, one of America’s most venerated and most
original writers. McPherson's characters -- gritty, authentic, and pristinely rendered -- give voice to
unheard struggles along the dividing lines of race and poverty in subtle, fluid prose that bears no trace of
sentimentality, agenda, or apology. First published in 1968, this collection includes the Atlantic Prize-
winning story “Gold Coast” (selected by John Updike for the collection Best American Short Stories of the
Century). Now with a new preface by Edward P. Jones, Hue and Cry introduced America to McPherson's
unforgettable, enduring vision, and distinctive artistry. Recounts the month-long battle between U.S.
Marines and North Vietnamese forces for control of the historically significant city of Hue. "An intimate—and disturbing—account of war at its most brutal, told from the point of view of civilians trying to survive the maelstrom." —Publishers Weekly Vietnam, January, 1968. As the citizens of Hue are preparing to celebrate Tet, the start of the Lunar New Year, Nha Ca arrives in the city to attend her father’s funeral. Without warning, war erupts all around them, drastically changing or cutting short their lives. After a month of fighting, their beautiful city lies in ruins and thousands of people are dead. Mourning Headband for Hue tells the story of what happened during the fierce North Vietnamese offensive and is an unvarnished and riveting account of war as experienced by ordinary people caught up in the violence. "A visceral reminder of war’s intimate slaughter." —Kirkus Reviews "[A] searing eyewitness account... It makes for an intimate—and disturbing—account of war at its most brutal told from the point of view of civilians trying to survive the maelstrom." —VVA Veteran In late January 1968, some 84,000 North Vietnamese and Viet Cong troops launched a country-wide general offensive in South Vietnam, mounting simultaneous assaults on 36 of 44 provincial capitals, and five of the six autonomous cities (including the capital city of Saigon). The longest and bloodiest battle occurred in Hue, the most venerated place in Vietnam. The bitter fighting that raged there for more than three weeks drew the attention of the world. Hue was the ancient capital of Vietnam, and as such, had been previously avoided by both sides; it had not seen any serious fighting prior to 1968. All that changed on the night of January 31 that year when four North Vietnamese battalions and supporting Viet Cong units simultaneously attacked and occupied both parts of the city straddling the Perfume River. The Communist forces dug in and prepared to defend their hold on the city. US Marines and South Vietnamese soldiers were ordered to clear the city, supported by US Army artillery and troops. A brutal urban battle ensued as combat raged from house to house and door to door. It was a bloody fight and resulted in large-scale destruction of Hue. Eventually, the Marines and the South Vietnamese forces retook Hue, but it turned out to be one of the longest and bloodiest battles of the Tet Offensive, and led to a sea change in US policy in Vietnam. In the history of mathematics there are many situations where calculations were performed incorrectly but this time the calculations were performed incorrectly and resulted in important practical applications. Let us look at some examples, the history of computing the number π began in Egypt and Babylon about 2000 years BC, since then many mathematicians have calculated π (e.g., Archimedes, Ptolemy, Viète, etc.). The π reveals formula for computing decimal digits of π was discovered by J. Machin (in 1706), who was the π to correctly compute 100 digits of π. Then many people used his method, e.g., W. Shanks calculated π with 707 digits (within 15 years), although due to mistakes only the π 527 were correct. For the next examples, we can mention the history of computing the π-structure constant (that was π discovered by A. Sommerfeld), and the mathematical tables, exact, lutions, and formulas, published in many many mathematical textbooks, were not verified rigorously [25]. These errors could have a large effect on results obtained by engineers. But sometimes, the solution of such problems required such technology that was not available at that time. In modern mathematics there exist computers that can perform various mathematical operations for which humans are incapable. Therefore the computers can be used to verify the results obtained by humans, to discovery new results, to—provetheseresult that human cannot obtain without any technology. With respect to our example of computing π, we can mention that recently (in 2002) Y. Kanada, Y. Ushiro, H. Kuroda, and M. As Vietnam’s former imperial capital, Hue occupied a special place in the hearts of the Vietnamese people. Over decades of conflict, it had been spared the terrible effects of war. But that all changed on January 31, 1968, the eve of Tet—the lunar new year, Vietnam’s most important national holiday Tet had previously been marked by a mutual ceasefire, but this time the celebrations and hopes for a happy new year were shattered. All of South Vietnam erupted in a cataclysm of violence as the North Vietnamese Army and the Viet Cong launched a massive military and political offensive. The American embassy in Saigon came under siege and Vietnam’s ancient capital city was captured nearly in its entirety. The only forces immediately available to counterattack into Hue were two Marine infantry companies based ten miles south of the city. For the next four weeks, as the world looked on, fewer than two thousand U.S. Marines fought street by street and put the building by building, with virtually no air support, to retake the symbols of Hue’s political and cultural importance. It was savage work. Ground gained was often measured in yards, with every alley, street corner, window, and garden adding to the butcher’s bill. In the end, the Marines retook the city, but scores of Americans and thousands of Vietnamese civilians died there. This pictorial is a testament to their will and their sacrifice. The Vietnam War is often pictured as a jungle conflict, punctuated by American troops fighting in rural hut-filled villages. But in the 1968 Tet Offensive, the war spilled out of the jungle into the streets of Hue City. The battle for Hue became one of the most important of the war, a month of grueling house-to-house fighting through buildings and around civilians. Marines In Hue City documents the intense urban combat in Hue with many never-before-published photographs, including more than one hundred in full color. Includes recent, unpublished projects by one of America’s top interior designers, including her home in Beverly Hills and celebrity residential projects, as well as her designs for hotels, in a book with 400 color photos that explores the power of color in the author’s work. In the past decade, the field of comparative cognition has grown and thrived. No less rigorous than purely behavioristic investigations, examinations of animal intelligence are useful for scientists and psychologists alike in their quest to understand the nature and mechanisms of intelligence. Extensive field research of various species has yielded exciting new areas of research, integrating findings from psychology, behavioral ecology, and ethology in a unique and wide-ranging synthesis of theory and research on animal cognition. The Oxford Handbook of Comparative Cognition contains sections on perception and illusion, attention and search, memory processes, spatial cognition, conceptization and categorization, problem solving and behavioral flexibility, and social cognition processes including findings in primate tool usage, pattern learning, and
counting. The authors have incorporated findings and theoretical approaches that reflect the current state of the field. This comprehensive volume will be a must-read for students and scientists who want to know about the state of the art of the modern science of comparative cognition. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing many of these classic works in affordable, high-quality, modern editions, using the original text and artwork. From products we use to clothes we wear, and spaces we inhabit, we rely on colour to provide visual appeal, data codes and meaning. Color and Design addresses how we understand and experience colour, and through specific examples explores how colour is used in a spectrum of design-based disciplines including apparel design, graphic design, interior design, and product design. Through highly engaging contributions from a wide range of international scholars and practitioners, the book explores colour as an individual and cultural phenomenon, as a pragmatic device for communication, and as a valuable marketing tool. Color and Design provides a comprehensive overview for scholars and an accessible text for students on a range of courses within design, fashion, cultural studies, anthropology, sociology and visual and material culture. Its exploration of colour in marketing as well as design makes this book an invaluable resource for professional designers. It will also allow practitioners to understand how and why colour is so extensively varied and offers such enormous potential to communicate. This is an inspirational story based on real-life events that leads to a discovery of Bills own humanity. After a tragic event, Bill is guided through his past to reveal four pillars of spirituality. The discovery reveals a path of life filled with opportunities. The struggle for bigger dreams in life competes with a darkness of complacency. The four pillars form one final lesson as darkness sets in again, revealing the foundation of life. Upon reflection of his journey, the path revealed Gods guiding hand. Intertwined with a miracle or two along the way, the disciplines became the foundation for his future success. A little girl goes off in search of her place in the world. She wonders who she is and where she fit in. So one day she set off to find out the answers to those wonderings. The title "America Sees a Hue" is a play on the Dr Suess title "Horton Hears a Who" as this book by Dr Suess was the source of a campaign against cancel culture in early 2021. "America Sees a Hue" explains the necessity for so-called cancel culture and why some of those who benefit from it are fighting so hard against it. New York Times Bestseller A Los Angeles Times Book Prize Finalist in History Winner of the 2018 Marine Corps Heritage Foundation Greene Award for a distinguished work of nonfiction "An extraordinary feat of journalism . . . full of emotion and color."—Karl Marlantes, Wall Street Journal The first battle book from Mark Bowden since his #1 New York Times bestseller Black Hawk Down, Hue 1968 is the story of the centerpiece of the Tet Offensive and a turning point in the American War in Vietnam. In the early hours of January 31, 1968, the North Vietnamese launched over one hundred attacks across South Vietnam in what would become known as the Tet Offensive. The lynchpin of Tet was the capture of Hue, Vietnam?s intellectual and cultural capital, by 10,000 National Liberation Front troops who descended from hidden camps and surged across the city of 140,000. Within hours the entire city was in their hands save for two small military outposts. American commanders refused to believe the size and scope of the Front?s presence, ordering small companies of marines against thousands of entrenched enemy troops. After several futile and deadly days, Lieutenant Colonel Ernie Cheatham would finally come up with a strategy to retake the city, block by block and building by building, in some of the most intense urban combat since World War II. With unprecedented access to war archives in the U.S. and Vietnam and interviews with participants from both sides, Bowden narrates each stage of this crucial battle through multiple viewpoints. Played out over 24 days and ultimately costing 10,000 lives, the Battle of Hue was by far the bloodiest of the entire war. When it ended, the American debate was never again about winning, only about how to leave. Hue 1968 is a gripping and moving account of this pivotal moment. The award-winning memoir of one tumultuous year of boyhood in Fort Worth, Texas, opening with a handshake with JFK, and recalling the changes and revelations of the months that followed. Winner of the LA Times Christopher Isherwood Prize for Autobiographical Prose, and a New York Times Editor's Choice. "A marvel of a book—elegant, touching, singular."—Mary Karr "Brief and moving . . . An elegantly written book, erudite, perceptive and at times painfully candid."—Moira Hodgson, Wall Street Journal After John F. Kennedy's speech in front of the Hotel Texas in Fort Worth on November 22, 1963, he was greeted by, among others, an 11-year-old Benjamin Taylor and his mother waiting to shake his hand. Only a few hours later, Taylor's teacher called Benjamin Taylor and his mother waiting to shake his hand. Only a few hours later, Taylor's teacher called

clarifies the murky history of the war and the role that journalists played in altering its course. The Cat from Huế has earned passionate acclaim from many of the most renowned journalists and writers about the war, as well as from military officers and war veterans, book reviewers, and readers. Now available in trade paperback with a new epilogue, this book will stand with Michael Herr’s Dispatches, Philip Caputo’s A Rumor of War, and Neil Sheehan’s A Bright, Shining Lie as one of the best books ever written about Vietnam—and about war generally. The bloody monthlong battle for the Citadel in Hue pitted U.S. Marines against an entrenched North Vietnamese Army force. By official accounts it was a tactical and moral victory for the Marines and the United States. But here survivor Nicholas Warr describes with urgency and outrage the Marines’ savage house-to-house fighting—ordered without air, naval, or artillery support by officers with no experience in that type of combat. Sparing few in the telling, Warr’s firsthand narrative tells of desperate Marine suicide charges and of the Marines’ selfless devotion to their comrades. His riveting account of the most vicious urban combat since World War II offers an unparalleled view of how a small-unit commander copes with the conflicting demands and responsibilities thrust upon him by the enemy, his men, and the chain of command.
