Technology Integration in education refers to the meaningful use of technology to achieve learning goals. This chapter seeks to answer the question: what is effective technology integration? Though on the surface this may seem like a simple question, it is actually quite difficult to answer, because any answer will be based upon our beliefs and values, how we view technology integration? For them, the main difference lies in the way knowledge is delivered (thanks to technology innovation) to make teaching more effective. In short, EdTech is the process of integrating technology into education to build better teaching-learning experiences that results in higher learning outcomes.

In this paper, we update and expand the data set on educational attainment. We extend our previous estimates from 1950 to 2010, and provide more, improved data disaggregated by sex and age. The data are broken down into 5-year age intervals, and the coverage has now expanded to 146 countries by adding 41, including 11 former Soviet republics.
