Psycho The Growth of Mind

Psycho The Growth of Mind is the product of a series of ten lectures by Neville Symington. It offers an understanding of the mind and its capacity to discover truth, establishing this as the foundation stone for our judgment and consciousness. The book attempts to understand better what this unconscious state is like and how we can think about it, underpinned by the belief that the better we understand it, the more its structure changes. The book includes an examination of the relationship between the unconscious and the conscious mind, the role of the ego, and the importance of metaphor in understanding psychological processes.

Mob Psycho 100: Reigen

The central theme of this book is the operation of intersecting discourses of power, privilege and positioning as they are revealed in fraught encounters between in-groups and out-groups in our everyday lives. The book examines how power structures and inequalities are negotiated and resisted, and how these dynamics affect our understanding of ourselves and our world.

A selection of essays by first-generation significians contributing to the Signific Movement in the Netherlands completes the collection, testifying to the progress of the movement and the ongoing relevance of its ideas.

Studia Psychologica

The theory of signifying (significs), formulated and introduced by Victoria Welby for the first time in 1890s, is at the basis of much of twentieth-century linguistics, as well as in other language and literature studies. This book offers an in-depth exploration of the theory, its development, and its implications for modern linguistics and other fields.
