Conflict, Peace, Security and Development New Directions in Peace Journalism

The Routledge Companion to News and Journalism is a Global Standard for Reporting Conflict, Peace, Security and Development New Directions in Media and Politics. It addresses the role of journalism in conflict resolution in multi-cultural, multi-racial, and multi-religious societies. It offers a comprehensive survey of the theory and practice of conflict resolution and the role of journalism in public spheres. And it shows how these concepts relate to ideas from peace research, in the form of Peace Journalism.

Shaw argues that journalism should focus on deconstructing the underlying structural and cultural causes of political violence such as poverty, famine and human trafficking, and play a constructive role in the process of peacebuilding. The author argues that human rights can aid peacebuilding efforts by helping victims of past violence to articulate their needs and preferences. The book offers a critical realist approach, considering critiques of 'correspondence' theories of representation to propose an innovative conceptualization of journalistic epistemology in which journalism is seen as the basis for a democratic society that cannot be accessed by traditional polls and surveys. It is also about analysing the role of journalism in conflict resolution. Part II sets the field within the context of rapid global change and addresses the controversies that have surrounded conflict resolution as it has entered the mainstream. Conflict Resolution is essential reading for students of peace and security studies, conflict management and international politics, as well as for those working in non-governmental organizations and think tanks.

The fiscal market is an unpredictable torrent of information that modern organizations strive to understand. Business professionals dedicate themselves to understanding uncertain results around the world in order to improve management practices and decision-making. This book provides a framework for understanding the key concepts, charts the development of the field, evaluates successes and failures, and assesses the main current challenges and debates in the second decade of the twenty-first century. It is an essential reference source that discusses identifying the behavioral patterns of managers and the accounting policies they use in different opportunistic environments.

Earnings Management is an essential reference source that discusses identifying the behavioral patterns of managers and the accounting policies they use in different opportunistic environments. It provides perspectives on how to live in a multi-cultural, multi-racial, and multi-religious society, this book is a critical reference source for educators, students of education, government officials, and administrators who hope to make a positive change.

Social media increasingly shapes the way in which we perceive conflicts and conflict parties abroad. This book explores the phenomenon by examining, (1) which strategies of external communication conflict parties use during a conflict, (2) what shapes the selection of these communication strategies. In a comprehensive case study of the conflict in Israel and Palestine, Bernd Hirschberger shows that the selection of strategies of external communication is shaped by the (asymmetric) conflict structure.

Shaw argues that journalism should focus on deconstructing the underlying structural and cultural causes of political violence such as poverty, famine and human trafficking, and play a proactive (preventative), rather than reactive (prescriptive) role in humanitarian intervention. This book critically examines the relationship between protecting human rights and building peace in post-violence societies. It explores the conditions that must be present, and strategies that should be adopted, for the former to contribute to the latter. The author argues that human rights can aid peacebuilding efforts by helping victims of past violence to articulate their grievances, and by encouraging the state to respond to and promote a democratic society. This usually happens either through a process of adjudication, whereby human rights can offer guidance to the judiciary as the best way to address such grievances, or through the passing and implementation of human rights laws and policies that seek to promote peace. However, this positive relationship between human rights and peace is both qualified and context specific. Through an interdisciplinary and comparative analysis of four case studies, the book identifies the conditions that can support the effective use of human rights as peacebuilding tools. Developing these, the book recommends a series of strategies that peacebuilders should adopt and rely on.

Peace Journalism, War and Conflict Resolution draws together the work of over twenty leading international writers, journalists, theorists and campaigners in the field of peace journalism. Mainstream media tend to promote the interests of the military and governments in their coverage of warfare. This major new text aims to provide a definitive, up-to-date, critical, engaging and accessible overview exploring the role of the media in conflict resolution. Sections focus in detail on theory, international practice, and critiques of mainstream media performance from a peace perspective. It includes the work of leading theorists such as Piers Butterworth, Bernadette Delf, Stephen Cooper and Graeme Wilson. The book identifies the conditions that can support the effective use of human rights as peacebuilding tools. Developing these, the book recommends a series of strategies that peacebuilders should adopt and rely on.

Long-time peace journalist Steven Youngblood presents the foundations of peace journalism in this exciting new textbook, offering readers the methods, approaches, and concepts required to use journalism as a tool for peace, reconciliation, and development. Guidance is offered on framing stories, ethical treatment of sensitive subjects, and avoiding polarizing stereotypes through a range of international examples and case studies spanning from the Iraq war to the recent unrest in Ferguson, Missouri. Youngblood teaches students to interrogate traditional media narratives about crime, race, politics, immigration, and civil unrest, and to illustrate where—and how—a peace journalism approach can lead to more responsible and constructive coverage, and even assist in the peace process itself.
This book provides a comprehensive, interdisciplinary, original, and holistic analysis of the socio-psychological dynamics of intractable conflicts. Daniel Bar-Tal's analysis rests on the premise that there are certain socio-psychological foundations, despite differences in context and other characteristics. He describes a full cycle of intractable conflicts - their outbreak, escalation, and reconciliation through peace building.

This book examines, through the case study of Indonesia over recent decades, how the reporting of violence can drive the escalation of violence, and how journalists can alter their reporting practices in order to have the opposite effect and promote peace. It discusses the nature of press freedom in Indonesia from 1966 onwards, considers the relationship between the press and politicians, and explores journalist(1)'s working methods. It goes on to outline in detail the communal wars in eastern Indonesia in the period 1999-2000, arguing that communication as much as material factors was key to understandings for the war. Key to this were professional roles of journalists, causing them to reproduce and enlarge the battle cries of those at war. The book concludes by advocating a "development communication" approach to journalism in transitional settings, in order to help journalists to counter the disintegrative tendencies of failing states and the communal crime that result.

This book explores the role and place of popular, traditional and digital media platforms in the mediatization, representation and performance of various conflicts and peacebuilding interventions in the African context. The role of the media in conflict is often depicted as either 'good' (as symbolized by peace journalism) and 'bad' (as exemplified by war journalism), but this book demonstrates the need to highlight the complexity of the media's role that the main claim of this book is that media, conflict and peacebuilding processes but it broadens its scope by critically analysing the dynamic and emergent roles of popular and digital media platforms in a continent where the semi-literate and oral communities still rely heavily on popular communication platforms to get news and information. Whilst social media platforms have been hailed for their assumed democratic and liberating potential, this book does not only focus on how the Internet has emerged as a new, disruptive aspects factors driving media politics in Africa, but also it also focuses on how the Internet has emerged as a new, disruptive aspects factors driving media politics in Africa, but also it also focuses on how the Internet has emerged as a new, disruptive aspects factors driving media politics in Africa, but also it also focuses on how the Internet has emerged as a new, disruptive aspects factors driving media politics in Africa, but also it also focuses on how the Internet has emerged as a new, disruptive aspects factors driving media politics in Africa, but also it also focuses on how the Internet has emerged as a new, disruptive aspects factors driving media politics in Africa, but also it also focuses on how the Internet.
This book should be read by anyone commissioning impact assessments who wants to build their understanding of the more progressive and innovative end of the topic. A job well done in the eyes of stakeholders and regulators requires proper social analysis. ‘Joh Samuel, Head of Social Performance, Anglo American ‘The list of authors reads like a who’s who in SIA. Academics and practitioners are equally represented among the authors. The book provides a good mix of broad theoretical concepts and specific practical topics.’ Martin Haseke, Manager, Environmental Impact Assessment at Mckenzie Valley Environmental Impact Review Board, Yellowknife, Northwest Territories, Canada ‘This book gives a very broad overview of where Social Impact Assessment is coming from, where it is now and where it could go: from an impact assessment tool to an impact management tool. It provides a realistic insight in both the achievements and the struggles of Social Impact Assessment. A recommended read for both those interested in Social Impact Assessment and those in related domains where social issues are gaining increasing importance, such as Environmental Assessment and Sustainability Appraisal.’ Rob Verheem, Deputy Director, Netherlands Commission for Environmental Assessment

This major new text explores and interrogates peace journalism as a significant challenge to this hegemonic discourse, which has been advocated and elaborated over the recent years in www.mediaethicsbook.com. and the environment - areas where such work is needed the most. Incorporating peacebuilding approaches in these fields is critical for transforming today's protracted conflicts into sustainable peace. Integrated Peacebuilding addresses the importance of weaving peacebuilding methods into diverse sectors including development, humanitarian assistance, gender, business, media, health, and the environment - areas where such work is needed the most. Incorporating peacebuilding approaches in these fields is critical for transforming today's protracted conflicts into sustainable peace.

Journalism as a 'Peacekeeping Agent' at the Time of Conflict offers a critical analysis media's role on peace-making and conflict-resolution. This groundbreaking book engages vexed and vexing questions about the future of the agenda, from the legacies of coloniality to the prospects of international and globalized approaches.

For building sustainable peace and security, the time is always now. Violence in our world exists beyond armed conflicts: it exists in our social and economic structures, not to mention in our destruction of the environment. How can we build more sustainable development and peace? In this innovative, ambitious book, Dr Luc Reychler argues that we must drastically change our time horizons in order to build more sustainable development and peace resolution. Based on Reychler's 40-year experience in the field, Time for Peace is an original and important contribution to the development and peace research literature.

This book offers a sober, contemplative and comprehensive coverage of Greek–Turkish relations, covering in depth the current political climate, with due regard to the historical dimension. The book uses up-to-date accounts of the traditional areas of unresolved conflict (Aegean, minorities, Cyprus, the Patriarchate), with emphasis on why they remain contentious, despite the thaw in Greek–Turkish relations from 1999 until recently. It also covers new topics and challenges that have led to cooperation as well as friction, such as unprecedented economic cooperation, energy resources, or the refugee crisis. Furthermore, the volume deals with the 'Europeanization' of Greek–Turkish relations and other facilitating factors as they appeared in the first decade of the 21st century (including the role of civil society) as well as the 'de-Europeanization' from the 2010 onwards, which presages a hazardous downward trend in their relations, often not helped by the media in both countries, which is also examined. This volume will be essential reading to scholars and students of Greek–Turkish relations, more generally Turkey, Greece and Norway, and more broadly to the study of South European Politics, European Union politics, security studies and International Relations.

What does gender equality mean for peace, justice, and security? At the turn of the 21st century, feminist advocates persuaded the United Nations Security Council to adopt a resolution that drew deeper into the questions that standard textbooks on IR/Security Studies had so far left unexplored. The Resolution on the importance of women's participation and leadership in peace and security processes has become a cornerstone of the field of gender and security. This volume offers an in-depth examination of the changes taking place in the working practices of journalists as ongoing, strategic assaults against them increase. Insights on Peace and Conflict Reporting is a powerful resource for students and academics in the fields of global journalism, foreign news reporting, conflict reporting, globalisation, media and international communication.

This new text explores and interrogates peace journalism as an important challenge to this hegemonic discourse, which has been advocated and elaborated over the recent years in journalism, media development and academic spheres. This book examines journalistic strategies in terms of the appropriation of media logics in the conflict frame-making process. Relying on three models (objectivity, mediation and news framing), it interrogates the role orientations and performance of journalists who breaking the narrow ground to keep peace in war. The book presents a comprehensive introduction to the theoretical principles of ethical journalism and the challenges it faces. It introduces the Pottery Box, with its four dimensions of analysis, to provide a framework for exploring the steps in moral reasoning and analyzing the cases. Focusing on a wide spectrum of ethical issues faced by media practitioners, the cases in this Twentieth Century include the most recent issues in journalism, broadcasting, advertising, public relations, and entertainment.
