Dec 16, 2021

A strategic approach for the supply chain, the integration of cybersecurity, and wherein the supply chain can be most vulnerable. • Understand the elements of a basic attack and what steps can be developed to help mitigate these risks. Supply chain management has always been focused on finetuning for speed and efficiency. But today’s requirements are different, broader, and more complex. Supply chains must be able to respond to the needs and values of individual customers, adaptive enough to serve segments of one, not markets of millions. They need to support greater customization and personalization.

Background

The project will address directives from Federal Energy Regulatory Commission (FERC) Order No. 829 to develop a new or modified standard to address “supply chain risk management for industrial control system hardware, software, and computing and networking services associated with bulk electric system operations.” See Order No. 829, at P 1.
