How to Use Storytelling in Your Academic Writing

Academics Writing recounts how academic writing is changing in the contemporary university, transforming what it means to be an academic and how, as a society, we produce academic knowledge. Writing practices are changing as the academic profession itself is reconfigured through new forms of governance and accountability, increasing use of digital resources, and the internationalisation of higher education. Through detailed studies of writing in the daily life of academics in different disciplines and in different institutions, this book explores: the space and time of academic writing; tensions between disciplines and institutions around genres of writing; the diversity of stances adopted towards the tools and technologies of writing, and towards engagement with social media; and the importance of relationships and collaboration with others, in writing and in ongoing learning in a context of constant change. Drawing out implications of the work for academics, university management, professional training, and policy, Academics Writing: The Dynamics of Knowledge Creation is key reading for anyone studying or researching writing, academic support, and development within education and applied linguistics.

Handbook of Writing Research, Second Edition

The Handbook of Research on Writing ventures to sum up inquiry over the last few decades on what we know about writing and the many ways we know it: How do people write? How do they learn to write and develop as writers? Under what conditions and for what purposes do people write? What resources and technologies do we use to write? How did our current forms and practices of writing emerge within social history? What impacts has writing had on society and the individual? What does it mean to be and to learn to be an active participant in contemporary systems of meaning? This cornerstone volume advances the field by aggregating the broad-ranging, interdisciplinary, multidimensional strands of writing research and bringing them together into a common intellectual space. Endeavoring to synthesize what has been learned about writing in all nations in recent decades, it reflects a wide scope of international research activity, with attention to writing at all levels of schooling and in all life situations. Chapter authors, all eminent researchers, come from disciplines as diverse as anthropology, archeology, typography, communication studies, linguistics, journalism, sociology, rhetoric, composition, law, medicine, education, history, and literacy studies. The Handbook’s 37 chapters are organized in
five sections: *The History of Writing; *Writing in Society; *Writing in Schooling; *Writing and the Individual; *Writing as Text This volume, in summing up what is known about writing, deepens our experience and appreciation of writing—ways that will make teachers better at teaching writing and all of its readers better as individual writers. It will be interesting and useful to scholars and researchers of writing, to anyone who teaches writing in any context at any level, and to all those who are just curious about writing.

**Mastering Academic Writing in the Sciences**

Writing matters, and so does research into real-life writing. The shift from an industrial to an information society has increased the importance of writing and text production in education, in everyday life and in more and more professions in the fields of economics and politics, science and technology, culture and media. Through writing, we build up organizations and social networks, develop projects, inform colleagues and customers, and generate the basis for decisions. The quality of writing is decisive for social resonance and professional success. This ubiquitous real-life writing is what the present handbook is about. The de Gruyter Handbook of Writing and Text Production brings together and systematizes state-of-the-art research. The volume contains five sections, focussing on (I) the theory and methodology of writing and text production research, as well as on problem-oriented and problem-solving approaches related to (II) authors, (III) modes and media, (IV) genres, and (V) domains of writing and text production. Throughout the 21 chapters, exemplary research projects illustrate the theoretical perspectives from globally relevant research spaces and traditions. Both established and future scholars can benefit from the handbook’s fresh approach to writing in the context of multimodal, multi-semiotic text production.

The Handbook of Academic Writing

"Academics are expected to write but seldom consider and discuss the nature of academic writing. As a result, the practice is shrouded in mystery. Writing for Academic Journals makes explicit much of what is normally opaque and it should be among the first ports of call for any academic who is contemplating getting published. This new edition achieves the near-impossible: improving on what was already acknowledged as a first-rate compendium". Professor Ronald Barnett, Institute of Education, University of London, UK "Our experience is that Rowena's practical approach works for busy academic staff. Not only does it enable them to increase their publication output and meet deadlines, but it boosts enthusiasm for writing and stimulates creative thinking." Kate Morss, Director, Queen Margaret University College, Edinburgh, UK "How many of us find the prospect of writing for an academic journal a daunting task so intimidating that barely an undetectable degree of arm twisting is required to further relegate the task to an ever lower position on our priority list? Sound familiar? Well look no further, those woes may be on the run thanks to this well thought-out and very readable short book." Ian Pearce, Consultant Urological Surgeon, Manchester Royal Infirmary This book unravels the process of writing academic papers. It tells readers what good papers look like and how they can be written. Busy academics must develop productive writing practices quickly. No one has time for trial and error. To pass external tests of research output we must write to a high standard while juggling other professional tasks. This may mean changing our writing behaviours. Writing for Academic Journals, Second Edition, has been comprehensively updated to include the most recent research and theory in order to provide new knowledge on writing across the disciplines. Drawing on her extensive experience of running writing workshops and working closely with academics on developing writing, Rowena Murray offers practical and tested strategies for good academic writing.

The Academic Skills Handbook

Concise Guide to APA Style

This book helps students and researchers write better assignments, better dissertations, and better papers for
publication. Characterizing academic writing as an integral part of the knowledge generation and dissemination
process, it focuses on three main aspects: understanding research, documenting and sharing the process and
results of research, and acknowledging the use of other people’s ideas in the documentation. The authors use
various samples of good as well as defective writing to illustrate the features of academic writing. They
describe in detail the structure and contents of academic papers, especially conceptual and empirical research
papers for journals. This lucidly written book will be a rich resource for MBA students and researchers working
for MPhil and PhD degrees, especially in the fields of management, behavioural sciences and communications.

Practical Academic Essay Writing Skills

The relationship of supervisor to student has traditionally been seen as one of apprenticeship, in which much
learning is tacit, with the expectation that the student will become much like the tutor. The changing
demographics of higher education in conjunction with imperatives of greater accountability and support for research students have rendered this scenario both less likely and less desirable and unfortunately many supervisors are challenged by the task of guiding non-native speaker students to completion. This handbook is the ideal guide for all supervisors working with undergraduate and postgraduate non-native speaker students writing a thesis or dissertation in English as it explicitly unpacks thesis writing, using language that is accessible to research supervisors from any discipline.
