Life Science Make Your Own Hand Sanitizer with These Crafty and Practical Handmade Recipes! Are you concerned about your health and hygiene? Do you want to learn how to make your very own hand sanitizer? NOW IS THE TIME! USE THIS PRACTICAL GUIDE FOR HAND SANITIZERS IN 2020 AND MAKE YOUR OWN TODAY! Good hygiene is a cornerstone of health. Our hands, in particular, are exposed to many bacteria and viruses. Washing your hands with soap and water is very effective, but doesn’t get the whole job done. There is a myth about hand sanitizers, that they’re not as effective as handwashing with soap. Wrong. While soap and water will remove all visible dirt from your hands, there are all kinds of different bacteria that are resistant to soap. Alcohol-based hand disinfection is the best option for killing bacteria and other unwanted microorganisms. For a hand sanitizer to be effective, it has to contain at least 60% alcohol. In addition to being more effective, alcohol-based sanitizers are also gentler on the hands. If you’ve washed your hands twenty times in a day, you might notice your skin is getting rough! This book will teach you: The real reason why handwashing is so important for health How does hand sanitizer work and why it’s better than soap Simple recipes for making hand sanitizers at home The 3 secrets of a successful hand sanitizer A no-brainer guide to using hand sanitizer properly You must be wondering: do hand sanitizers really work? Are they safe? Yes, they are safe! Especially if made at home, where you know what’s going in. And do they work? Hand sanitizers can never replace handwashing, but they are a super important supplement to soap and water. Using both ways, you’ll make sure that all the dirt, bacteria and viruses are safely removed from your hands! Ready to Make Some Sanitizer? Wastewater Pathogens You Are A Step Away From Discovering How You Can Start Making Your Very Own Facemasks To Keep Of Viruses And Bacteria And Ultimately Protect Yourself From Contracting Infectious Diseases! As the current pandemic keeps spreading around the world, more and more people are coming to the realization that if you are to protect yourself from contracting the virus and deal with the stigma that often comes with having only a few (infected people) wear facemasks, everyone has to put on a facemask. If we all carry ourselves as invisible infectious individuals, the transmission rate will slow down the spread. And as you would expect, as more people demand facemasks, the prices shoot up and often times, facemasks are become go out of stock. What’s more, most of the store bought facemasks are single use facemasks, which essentially means that if you then have to put on a new mask at least every day, if not every few hours. The costs can easily add up when you have to cycle through several masks every single day or week. What is the other option, you may wonder? Well, the other option is to make your own homemade facemasks that, You can...
use as many times as you want. You can wash whatever you want. You can have one ready for use whenever you need it. Can help you keep the cost of facemasks low especially since we may not know how long the pandemic may take to contain. I know you may be wondering Will a homemade facemask be as effective as the ones used in hospitals? How effective are facemasks. Do you make your own facemask – isn't that the stuff that requires you to have a medical mask? What will you need to make facemasks. What are the different approaches that you can use to make facemasks? What skills will you need to have to create your own facemasks? If you have these and other related questions, keep reading. Here is a preview of what to expect in this book: The basics of facemasks, including how they work to keep off infectious diseases. Reasons why each individual should design, make, and wear their own cloth face mask to avoid contracting viruses. How to make the main fabric. How to make a pocket for filtration in a face mask. The proper way to fix and remove a face mask. All about the efficacy of custom-made face masks. How to use facemask to prevent flu and fight viruses. How to keep yourself safe and healthy during the pandemic and how to prevent spreading of germs and viruses. And much more. Indeed; one of the keys to beating infectious diseases is putting on masks. At some point during the Flu of 1918, it was mandatory to put on facemasks. If we are to beat this pandemic, this may be our chance. And to prepare for that, you MUST master the skill of making your facemasks. DIY Homemade Hand Sanitizer

DIY Homemade Hand Sanitizer Did you try to find hand sanitizers in stores, but you realized that they are increasingly expensive or worse, absent? Did you decide to make your own hand sanitizer but don’t know how? DIY Homemade Hand Sanitizer will give you the right informations to produce a perfect DIY hand sanitizer in just a few steps! With the recent spread of Coronavirus (COVID-19), all the attention is focused on the shields we have to protect ourselves: one of these shields is to pay attention to our personal hygiene: so, let’s keep our hands clean! The WHO (World Health Organization) recommends washing your hands for at least 20 seconds multiple times a day, but in facts, this isn’t always possible: for instance, when you are traveling or when you're going to work or even taking the metro or the train, you cannot wash your hands every few minutes; that’s when a hand sanitizer becomes your best friend! Unfortunately, hand sanitizer gel is becoming increasingly expensive because of the pandemic currently spreading all over the world. Therefore, many people have decided to do that themselves. Making your own hand sanitizer is a simple process that results in a formula you can customize to suit your personal tastes. But be careful: not all hand sanitizers are able to protect you from germs, bacteria and viruses! The WHO recommends that a useful and virucide hand sanitizer must contain at least 60% alcohol for maximum efficacy, and if you're reading this you already know that right now, they are sold at 10 or even 20 times their normal price. So, in this Guide you can easily learn How to Make the Most Effective Natural Homemade Hand Sanitizer to Eliminate Viruses and Bacteria! In this Guide, you'll find: How to make the only DIY hand sanitizer accredited by WHO even if you are unexperienced. Why using a hand sanitizer is better than a normal hand wash. Green Genius Guide Committee on Infectious Diseases of Mice and Rats, National Research Council This companion to Infectious Diseases of Mice and Rats makes practical information on rodent diseases readily accessible to researchers. This volume parallels the three parts of the main volume. Part I, Principles of Rodent Disease Prevention, briefly examines the requirements for maintaining pathogen-free rodents, factors in designing health surveillance programs, and other laboratory management issues. Part II, Disease Agents, is an easy-to-use reference section, listing diagnosis and control methods, the potential for interference with research, and other factors for disease agents ranging from adenoviruses to tapeworms. It covers bacteria, viruses, fungi and common ectoparasites, and endoparasites. Part III, Diagnostic Indexes, presents alphabetical listings of clinical signs, pathology, and research complications and lists infectious agents that might be responsible for each.

Discover Bacteria, Viruses & Parasites This stunningly illustrated book provides a rare window into the amazing, varied, and often beautiful world of viruses. Contrary to popular belief, not all viruses are bad for you. In fact, several are beneficial to their hosts, and many are crucial to the health of our planet. Virus offers an unprecedented look at 101 incredible microbes that infect all branches of life on Earth—from humans and other animals to insects, plants, fungi, and bacteria. Featuring hundreds of breathtaking color images throughout, this guide begins with a lively and informative introduction to virology. Here readers can learn about the history of this unique science, how viruses are named, how their genes work, how they copy and package themselves, how they interact with their hosts, how immune systems counteract viruses, and how viruses travel from host to host. The concise entries that follow highlight important or interesting facts about each virus. Learn about the geographic origins of dengue and why old tires and unused pots help the virus to spread. Read about Ebola, Zika, West Nile, Frog virus 3, the Tulip breaking virus, and many others—how they were discovered, what their hosts are, how they are transmitted, whether or not there is a vaccine, and much more. Each entry is easy to read and includes a graphic of the virus, and nearly every entry features a colorized image of the virus as seen through the microscope. Written by a leading authority, this handsomely illustrated guide reveals the unseen wonders of the microbial world. It will give you an entirely new appreciation for viruses.

KIDS GT VIRUSES & BACTERIA Viruses are the last frontier of undiscovered life on our planet. The most abundant type of organism on Earth, they infect all types of cellular life, and, as micro-organisms that cause disease in their hosts, they are highly opportunist and relentlessly efficient. They exist at the vanguard of DNA variance, exhibiting more structural diversity than plants, animals, archaea, or even bacteria. This 21st-century guide offers an engaging introductory section explaining exactly what viruses are and how they operate, followed by individual profiles of 101 of the world’s most notable examples, each with its own dazzling mugshot
